To Whom It May Concern:

I wanted to thank Mr. Angel for the support he provided this past summer for my son. My son participated in a six week individual class with the program Reading & Rhythm. Over the course of the one hour classes provided by Mr. Angel, there was a significant improvement shown in my son's reading including fluency and comprehension. In returning to class this school year, one of his teachers, without knowing he had engaged in this program over the summer, shared with us, that she had observed a significant improvement in his reading ability.

I truly appreciated Mr. Angel allowing us as his parents to observe the sessions and learn strategies that could support the work he was doing with him in the class. We were able to participate in some of the strategies during the class which assisted us in being able to replicate them at home. One of the most striking components of the program was Mr. Angel's focus on supporting my son's confidence in his own natural abilities. His mantra, 'trust your mind' rang very true and my son gained confidence which led the way for him to incorporate the skills needed to improve his reading.

This is a great program which could assist any child, adolescent or adult who is having difficulty with reading. I highly value this program and Mr. Angel's expertise through the use of this medium and would highly recommend it for anyone. I could see its great benefit in the classrooms as it taps into a child's natural strengths.

Thank you very much Mr. Angel for all your support, encouragement and strength building. It is a lifelong gift and we as his parents will forever be grateful.

Sincerely,

Mrs. Moreno
